Re: Belvedere Plantation Treated Wastewater Application Site, Pender County, North Carolina  
Major Site Development Plan

Dear Mr. O'Mahony,

Attached to this cover letter is the proposed *Major Site Development Plan* submitted in effort to obtain final zoning approval from the Pender County Planning Department. The project proposes three infiltration basins constructed of earthen berms and import sand. A groundwater management system consisting of a fourteen feet deep gravel bottom trench and a perforated pipe will surround each basin. All of these facilities are either constructed out of graded dirt and less than ten feet in height or below grade. There is a proposed pump station accessed by a long gravel driveway from Sloop Point Loop Road. Here again, these facilities are either at or below grade. The entrance off Sloop Point Loop Road will include a continuous landscape berm separated only to allow the drive to reach into the body of the property. There will be a swing gate with two columns with a sign affixed.

This project obtained a Special Use Permit on August 22, 2014. The remaining necessary permits have been issued and the project is ready for construction. Please consider this in effort of releasing this project for building permits in this regard. Thank you for your assistance with this project. Please let me know if you have any further requirements or questions. I look forward to your response.

Respectfully,

James Fentress Jr., P.E.
