

REQUEST FOR BOARD ACTION / CONTRACT CONTROL FORM

Tracking Number: 4

Date of Request: August 13, 2007

Date Request Received: August 20, 2007

Board Meeting Date Requested: August 20, 2007

Board Meeting Date Assigned: August 20, 2007

Short Title: Renewal Of Beaver Management Contracts

Request Status:

- Request is proceeding to Board of Commissioners
- More information is needed – see attached
- Request on hold – no further information needed
- Other:

Background: The county has participated in the Beaver Management Assistance Program (BMAP) since October 1994. This program, administered through the USDA Animal and Plant Health Inspection Service (APHIS) - Wildlife Services (WS), was created by the state in 1992 to help counties manage their beaver problems associated with an increasing beaver population. The county's cost share to participate is \$4000 payable annually in September. In addition, the county has maintained a cooperative service agreement through this program to obtain the services of an additional beaver wildlife specialist in order to more adequately address this growing problem in Pender County. Total cost for the beaver management program is \$71,500 for Fiscal Year 2007-08. This amount provides services equivalent to one full time and one 1/3 time beaver management specialist.

(Administrative Use Only)

CONTRACT TYPE

- Renewal
- For Service(s)
- Intergovernmental – County as Grantee
 - Federal Grantor
 - State Grantor
 - Grantor
- County as Grantor
 - County Funds
 - Other Funds:
- Revision
- For Equipment

As the commissioners directed during the budget meetings, the additional 1/3 specialist will be dedicated to critical sections of the following watersheds, which were identified by Bob Murray as having high priority: 1) Burgaw Creek, Sills Creek, Moores Creek and Long Creek. In addition, to obtain the greatest value for this 1/3 position, this position will work from January through April, the most productive time period. If there is additional time available, this position will also work additional trouble spots on Moore Creek and Turkey Creek. Bob Murray will dedicate his time to covering the rest of the county.

COOPERATIVE SERVICE AGREEMENT
between
PENDER COUNTY
and
UNITED STATES DEPARTMENT OF AGRICULTURE
ANIMAL AND PLANT HEALTH INSPECTION SERVICE (APHIS)
WILDLIFE SERVICES (WS)

ARTICLE 1

The purpose of this Cooperative Service Agreement is to provide Pender County, North Carolina residents and others beaver damage management services following Beaver Management Assistance Program (BMAP) policies and procedures (Appendix 1) to reduce or eliminate property damage and threats to human health and safety caused by beaver activities. Work will be conducted in Pender County. These services will be provided above and beyond that received through the County's participation in the BMAP.

ARTICLE 2

APHIS WS has statutory authority under the Act of March 2, 1931 (46 Stat. 1468; 7 U.S.C.426-426b) as amended, and the Act of December 22, 1987 (101Stat. 1329-331, 7 U.S.C. 426c), to cooperate with States, local jurisdictions, individuals, public and private agencies, organizations, and institutions while conducting a program of wildlife services involving mammal and bird species that are reservoirs for zoonotic diseases, or animal species that are injurious and/or a nuisance to, among other things, agriculture, horticulture, forestry, animal husbandry, wildlife, and human health and safety.

ARTICLE 3

APHIS-WS and PENDER COUNTY mutually agree:

1. The parties' authorized representatives who shall be responsible for carrying out the provisions of this Agreement shall be:

Pender County: Lori Brill, Pender County Manager
807 S. Walker Street, P.O. Box 5
Burgaw, NC 28425

APHIS-WS: Jon F. Heisterberg, State Director
6213-E Angus Drive
Raleigh, NC 27617

2. To meet as determined necessary by either party to discuss mutual program interests, accomplishments, needs, technology, and procedures to maintain or amend the Work Plan (Attachment A). Personnel authorized to attend meetings under this Agreement shall be

Lori Brill or her designee, Jon Heisterberg or his designee, and/or those additional persons authorized and approved by the Pender County Manager, and the State Director.

3. APHIS-WS shall perform services more fully set forth in the Work Plan, which is attached hereto and made a part hereof. The parties may mutually agree in writing, at any time during the term of this Agreement, to amend, modify, add or delete services from the Work Plan.

ARTICLE 4

PENDER COUNTY agrees:

1. To authorize APHIS-WS to conduct direct control activities to reduce human health and safety risks and property damage associated with beaver activities. These activities are defined in the Work Plan. APHIS-WS will be considered an invitee on the lands controlled by Pender County. Pender County will be required to exercise reasonable care to warn APHIS-WS as to dangerous conditions or activities in the project areas.
2. To deposit \$67,500 with APHIS-WS (payable to USDA) for costs of services provided under this Agreement per the attached Financial Plan (Attachment B). This is in addition to the \$4,000 BMAP participation fee, payable and sent to the NC Wildlife Resources Commission, no later than September 30 of each year set forth by General Statute 113-291.10. The Cooperator ensures and certifies that it is not currently debarred or suspended and is free of delinquent Federal debt.
3. To designate to APHIS-WS the Pender County authorized individual whose responsibility shall be the coordination and administration of activities conducted pursuant to this Agreement.
4. To notify APHIS-WS verbally or in writing as far in advance as practical of the date and time of any proposed meeting related to the program.
5. APHIS-WS shall be responsible for administration and supervision of the program.
6. All equipment purchased for the program is and will remain the property of APHIS-WS.
7. To coordinate with APHIS-WS before responding to all media requests.

ARTICLE 5

APHIS-WS Agrees:

1. To conduct activities in Pender County as described in the Work and Financial Plans.

2. Designate to Pender County the authorized APHIS-WS individual who shall be responsible for the joint administration of the activities conducted pursuant to this Agreement.
3. To deposit \$67,500 as specified in the Financial Plan upon execution of this Cooperative Service Agreement for services agreed upon and specified in the Work Plan. APHIS-WS shall keep records and receipts of all expenditures hereunder for a period of not less than one year from the date of completion of the services provided under this Agreement and Pender County shall have the right to inspect and audit such records.
4. To coordinate with Pender County before responding to all media requests.

ARTICLE 6

This Agreement is contingent upon the passage by Congress of an appropriation from which expenditures may be legally met and shall not obligate APHIS upon failure of Congress to so appropriate. This Agreement may also be reduced or terminated if Congress only provides APHIS funds for a finite period under a Continuing Resolution.

ARTICLE 7

APHIS assumes no liability for any actions or activities conducted under this Cooperative Service Agreement except to the extent that recourse or remedies are provided by Congress under the Federal Tort Claims Act (28 U.S.C. 1346(b), 2401(b), and 2671-2680).

ARTICLE 8

Pursuant to Section 22, Title 41, United States Code, no member of or delegate to Congress shall be admitted to any share or part of this Agreement or to any benefit to arise therefrom.

ARTICLE 9

All activities will be conducted in accordance with all applicable Federal, State and local laws, rules, and regulations. Nothing in this Agreement shall prevent APHIS- WS from entering into separate agreements with any other organization or individual for the purpose of providing wildlife damage management services exclusive of those provided for under this agreement.

ARTICLE 10

Pender County certifies that wildlife damage management options, including the use of services provided by the private sector, have been carefully considered. After considering these options, Pender County requests that APHIS-WS provide its services under the stated terms of this Agreement.

ARTICLE 11

The performance of wildlife damage management actions by APHIS-WS under this agreement is contingent upon a determination by APHIS-WS that such actions are in compliance with the National Environmental Policy Act, Endangered Species Act, and any other applicable environmental statutes. APHIS-WS will not make a final decision to conduct requested wildlife damage management actions until it has made the determination of such compliance.

ARTICLE 12

This Cooperative Service Agreement may be amended at any time by mutual agreement of the parties in writing. Also, this Agreement may be terminated at any time by mutual agreement of the parties in writing, or by one party provided that party notifies the other in writing at least 120 days prior to effecting such action. The length of notice for unilateral termination may be longer or shorter if necessary. Further, in the event the Cooperator does not provide necessary funds, APHIS-WS is relieved of the obligation to provide services under this agreement.

In accordance with the Debt Collection Improvement Act of 1996, the Department of Treasury requires a **Taxpayer Identification Number** for individuals or businesses conducting business with the agency.

ATTACHMENT A WORK PLAN

Introduction

The U.S. Department of Agriculture (USDA) is authorized to protect American agriculture and other resources from damage associated with wildlife. The primary authority for Wildlife Services (WS) is the Act of March 2, 1931 (46 Stat. 1468; 7 U.S.C.426-426b) as amended, and the Act of December 22, 1987 (101Stat. 1329-331, 7 U.S.C. 426c). Wildlife Services activities are conducted in cooperation with other Federal, State and local agencies; private organizations and individuals.

The WS program uses an Integrated Wildlife Damage Management (IWDM) approach (sometimes referred to as IPM or "Integrated Pest Management") in which a series of methods may be used or recommended to reduce wildlife damage. IWDM is described in Chapter 1, 1-7 of the Animal Damage Control Program Final Environmental Impact Statement (USDA, 1994). These methods include the alteration of cultural practices as well as habitat and behavioral modification to prevent damage. However, controlling wildlife damage may require that the offending animal(s) are killed or that the populations of the offending species be reduced.

Purpose

Pender County requested additional assistance in managing beaver damage problems above and beyond that currently provided through the Beaver Management Assistance Program. Additional assistance was requested to help alleviate flooding problems, property damage, and protect human health and safety. Beaver damage has especially been a concern for the County over the past several years due to an increase in the number of beaver damage complaints from County residents and businesses. Pender County will receive a full-time beaver wildlife specialist under this agreement above and beyond that received through the County's participation in the BMAP.

Planned USDA, APHIS, Wildlife Services Activities

1. WS will use an integrated pest management approach to manage beaver damage in areas designated by Pender County for the purpose of reducing property damage and protecting human health and safety.

2. Pender County residents and others will receive prompt technical assistance, direct beaver damage management measures, educational workshops and programs, and liaison with regulatory agencies. Liaison with federal and state regulatory agencies will be for consultation on endangered and threatened species, wildlife management and ecology, permits to take wildlife, and state and federal wildlife laws and regulations.
3. All work will follow BMAP Policies and Procedures as established by the BMAP Advisory Board (Appendix 1).
4. The following four watersheds will be the primary area worked with the additional full-time help from January 2008 – April 2008 spending approximately one month at each location:
 - a. Burgaw Creek – from Stag Park Road to I-40
 - b. Sills Creek – the entire system
 - c. Moores Creek – from NC 210 to US 421
 - d. Long Creek – NC 210 to Penderlea Hwy.
5. If there is additional time available work will be conducted in identified trouble spots in the following watersheds:
 - a. Moore Creek – identified trouble spots
 - b. Turkey Creek – identified trouble spots

Effective Dates

The agreement shall commence on July 1, 2007 and shall expire on June 30, 2008.

**ATTACHMENT B
FINANCIAL PLAN**

Personnel Costs	\$46,110
Travel and Vehicle Usage.....	\$10,000
Supplies and Equipment.....	\$ 2,000
Program Support	\$ 9,390
TOTAL	\$67,500

The distribution of the budget from this Financial Plan may vary as necessary to accomplish the purpose of this agreement, but may not exceed \$67,500.

Appendix 1
NORTH CAROLINA BEAVER MANAGEMENT ASSISTANCE PROGRAM (BMAP)
FY 2007 (OCTOBER 2006 – SEPTEMBER 2007) POLICIES AND PROCEDURES

The North Carolina Beaver Management Assistance Pilot Program, later known as the Beaver Management Assistance Program (BMAP), was established in November 1992. Since that time the program has grown more than tenfold from four participating counties in 1992-93 to 43 in 2006-2007. At the same time, BMAP services to the North Carolina Department of Transportation (NCDOT) have grown from four counties in 1992-93 to all 100 North Carolina counties in 1998. To ensure that program administration and operation are clear, the BMAP Advisory Board has compiled and approved the following policies and procedures.

HISTORY OF BEAVER IN NORTH CAROLINA

Historically, beaver were considered a valuable natural resource and were an extremely important part of the North Carolina economy. Well into the 1800's, beaver fur was the primary item of trade, and without trapping or hunting regulations, beaver were trapped to near extinction by the late 1890's.

In 1939, in an effort to assist the public and effectively manage wildlife and natural resources in the state, the North Carolina Department of Conservation and Development (the predecessor of the North Carolina Wildlife Resource Commission) (NCWRC) obtained 29 beaver from Pennsylvania and released them in North Carolina on what is now the Sandhills Game Lands. Because of economic and aesthetic values, public demand for beaver restocking remained high and restocking programs were continued between 1951 and 1956 with an additional 54 beaver being stocked over a nine-county area. The restocking and management efforts of the NCWRC were successful, and by 1953 there were an estimated 1,000 beaver over a seven-county area in the state. Today, beaver occupy watersheds throughout nearly the entire state with estimated statewide populations as high as 500,000.

While beaver populations are thriving and expanding throughout the state, resource use practices have changed, and there is no longer as high a demand for beaver products as there once was. This has resulted, in some areas, in beaver populations expanding to levels where they are in conflict with the health, safety, and livelihood of people.

In the early 1990's, state and county agencies and the public had few places to turn for relief from beaver damage as private trappers were few and far between and generally conducted beaver damage control activities only as a hobby or part time job. In the early to mid-1990's, at least three North Carolina counties attempted to use bounties to reduce beaver damage. These efforts proved to have little effect on alleviating specific beaver damage problems.

CREATION OF THE BMAP

Responding to public complaints and requests for assistance, the 1991 Session of the North Carolina Legislature created the North Carolina Beaver Damage Control Advisory Board effective July 1, 1992. The Board is composed of the administrative heads, or their designees, of the NC Wildlife Resources Commission (Chair), NC Department of Agriculture, NC Division of Forest Resources, NC Soil and Water Conservation Division, NC Cooperative Extension Service, NCDOT, NC Farm Bureau Federation, NC Forestry Association, and U.S. Dept. of Agriculture's Division of Wildlife Services. The Board was mandated to develop a program to manage beaver damage on public and private lands. This includes developing a priority system for responding to beaver damage complaints, developing a system for documenting activities, providing educational programs, providing for the hiring of personnel, evaluating the costs and benefits of the program, and advising the NCWRC on its implementation.

Utilizing the expertise of NCWRC and USDA Wildlife Services personnel, considering the past history of beaver damage management efforts in the state, and drawing on the experiences of other states, the Advisory Board created the Beaver Management Assistance Pilot Program in November 1992. The primary focus of the program was oriented towards public health and safety and assistance to landholders experiencing beaver damage problems. The program was structured to be flexible, fair, and feasible. Because of practical and ecological considerations, the program was designed to assist the NCDOT, landholders, and others address specific beaver damage problems rather than to eradicate beaver populations over wide areas. The key to success of the program was the active participation of the NCWRC, USDA Wildlife Services, counties, landholders, Cooperative Extension Service and NCDOT personnel. Because of the success of the pilot program, the name was changed to the Beaver Management Assistance Program (BMAP) in 1995. In 1998 the BMAP was expanded to include all 100 North Carolina counties.

PROGRAM IMPLEMENTATION

Wildlife specialists use an Integrated Wildlife Damage Management approach in which a combination of methods may be used or recommended to reduce wildlife damage. Wildlife specialists use proven beaver damage management techniques and equipment to alleviate beaver damage. Whenever feasible, the use of non-lethal techniques is recommended and/or implemented; however, lethal beaver removal techniques are the predominant methods used. Wildlife specialists encourage landholders not to remove beaver if they determine such activities would result in little or no benefit to the landholder. Due to practical and ecological considerations, the NCWRC does not permit relocation of beaver within the state.

When conducting lethal management activities, beaver are the target species. Trapping is the primary tool for removing beaver from public and private property. Shooting is also used. Beaver damage management techniques are used selectively to ensure public safety and minimize detrimental effects on other animals. Animals captured other than nutria (an undesirable species not native to North America) are released whenever possible. Beaver are offered to the landholder, disposed of in a sanitary manner, or sold, when practical and feasible, to provide additional funding for the BMAP. Some may be kept for future research, study or

educational needs, or other purposes. When necessary to alleviate flooding, beaver dams are removed by wildlife specialists using hand tools or explosives. All wildlife damage management activities that take place are undertaken according to relevant laws, regulations, policies, orders, or procedures.

COUNTY PARTICIPATION

County participation is required before any direct beaver damage management assistance is provided to landholders under the BMAP. Participation in the program is currently open to all North Carolina counties. Counties must renew participation annually. In April of each year, the NCWRC will send a letter to each county advising it of program eligibility. To participate, a county must respond by established deadlines as set forth by the Advisory Board or general statute. General Statute 113-291.10 requires that a county wanting to participate in the program in a given fiscal year shall provide written notification of its wish to participate and shall commit \$4,000 in local funds no later than September 30 of that year. Counties not in the program the previous fiscal year who elect to participate in the program will receive BMAP services starting in October or November of the current fiscal year.

Questions concerning county participation or program operations should be directed to either the USDA's Wildlife Services office in Raleigh at (919) 786-4480 or the NC Wildlife Resources Commission Division of Wildlife Management office in Raleigh at (919) 733-7291.

BMAP ASSISTANCE IN PARTICIPATING COUNTIES

BMAP participating counties can expect to receive service based on the number of counties opting to participate in any particular fiscal year. The more counties that participate, the fewer hours of service those counties will receive, and vice versa. In FY 2007, 43 counties opted to participate. This translates to each county receiving an average of 700-800 man hours annually for work on both public (DOT) and private lands in the county. Some counties may receive more service and some less depending on available state, federal, and private funding, the demand for BMAP services in that county, and the geographical area in which a wildlife specialist works.

ADDITIONAL BMAP ASSISTANCE IN PARTICIPATING COUNTIES

Participating counties occasionally request beaver management services for landholders in addition to those received under the BMAP. Generally, requests for additional assistance (beyond the average 700-800 man hours of assistance provided by the BMAP in FY 2007) require hiring additional experienced personnel, which is inherently difficult, especially if such a request is for seasonal or less than full time work. If Wildlife Services is able to accommodate such requests, any additional work provided landholders in the county will follow BMAP guidelines, with only specific beaver damage problems being addressed, and the landholders paying the cost share as outlined under the section entitled "Landholder Cost Share in Participating Counties." Cost share fees paid by individual landholders will be used to support the overall BMAP. Any county requesting additional assistance pays full program costs (labor, travel, supplies and equipment, etc.). In addition, both landholders and the DOT will receive

services. To receive additional services, a county enters into a cooperative service agreement with Wildlife Services with payment going directly to Wildlife Services, not the NCWRC.

BMAP ASSISTANCE IN NON-PARTICIPATING COUNTIES

Landholders and others residing in nonparticipating counties (counties electing not to pay the \$4,000 cost share) are ineligible to receive BMAP services. Wildlife Services may, however, enter into beaver damage management agreements with these landholders separate from the BMAP. Costs of services provided under these agreements are paid by the landholder.

BMAP services are conducted for the NCDOT in all North Carolina counties regardless of a county's participation in the program.

BMAP ADMINISTRATION AND FUNDING

Actual administrative authority for the BMAP rests with the NCWRC, but enabling legislation allows the NCWRC to transfer program administration, upon agreement, to Wildlife Services. Presently, Wildlife Services administers the BMAP according to the plan developed by the Beaver Damage Control Advisory Board and approved by the NCWRC. Administration of the BMAP follows the federal fiscal year (October through September).

Funding for the BMAP comes from state, county, federal, and private sources, making the BMAP a truly cooperative effort. All state and county funding is collected by the NCWRC. The NCWRC then enters into a cooperative service agreement with Wildlife Services to conduct the work.

STATE COST SHARE

The extent of state funding is set by state legislation. State general funds appropriations, earmarked for the BMAP, are made available to the Wildlife Resources Commission budget. In state fiscal year 2006-2007 this is \$349,000.

Additional cost-share funding is provided by the NCDOT. In fiscal year 2006-2007 the NCDOT will contribute \$300,000 towards the program. There are no additional cost-share charges to the NCDOT relating to beaver damage management along state-owned highways, roads, and bridges throughout North Carolina. If beaver damage management work must be conducted on adjacent properties to resolve a problem affecting NCDOT rights-of-way, those landholders are not charged for services.

COUNTY COST SHARE

General Statute 113-291.10 sets a \$4,000 cost share a county government must pay so that landholders, businesses, and others residing in that county are eligible for services. Counties paying the \$4,000 cost share are considered participating counties. All county cost share participation fees are made payable to the NC Wildlife Resources Commission, NCSU

Centennial Campus, 1751 Varsity Dr., Raleigh, NC 27606 ATTN.: Beaver Management Assistance Program.

LANDHOLDER COST SHARE IN PARTICIPATING COUNTIES

For purposes of this document, landholders who request BMAP services in a participating county are those who own/lease land or operate a business in that county. This includes public-owned businesses, municipalities, county governments, soil and water conservation districts and others. Landholders in participating counties requesting BMAP services are required to pay a cost share for services as set by the Beaver Damage Control Advisory Board. This cost share fee also applies to landholders receiving beaver damage management services through cooperatively funded agreements between counties and Wildlife Services where the county fully funds the beaver damage management work (see "Additional BMAP Assistance in Participating Counties"). Landholder cost share fees are billed and collected by Wildlife Services or the county, are paid for by the county, or are indirectly collected by the county through a local tax where a county funds the landholder cost share fees. All landholder cost share funds collected by Wildlife Services are made available to the BMAP through a separate trust fund agreement.

The BMAP Advisory Board set the landholder cost share at \$15 for each separate visit a wildlife specialist makes to a landholder's property or properties. There is no charge for the initial assessment which is defined as the time spent with a landholder whether in person or over the phone to discuss the BMAP and sign the paperwork. A site visit is defined as a trip to a landholder's property or properties during which time beaver damage management activities occur. A site visit may last an entire day (as might be the case when initially setting traps on a property), or as little as 15 minutes. Landholders are also charged \$100 for beaver dam removal. Landholders requesting BMAP services requiring beaver damage management work on adjacent lands are required to provide for payment of those services. Additionally, written permission from adjacent landholders is required. After 15 visits to a landholder's property or properties in any given fiscal year, the landholder is required to pay full costs for BMAP services.

FEDERAL COST SHARE

A minimum of \$25,000 annually in federal funding is directed by Wildlife Services specifically for beaver damage management work in North Carolina. This is also a requirement of the enabling state legislation. In FY 2007, the federal government will contribute an estimated \$235,000. All federal funding goes directly into the North Carolina Wildlife Services budget where it is earmarked for conducting BMAP activities.

REQUESTS FOR ASSISTANCE

Landholders should make requests for assistance through their local cooperative extension service office or, in some cases, their local soil and water conservation district office or other designated contact. Each year a BMAP leaflet listing telephone contacts, by county, is distributed to all interested parties.

Requests for technical assistance, educational programs, and similar activities are given high priority and are provided at no cost to cooperators and the general public. Technical assistance includes recommendations, advice, and hands-on training aimed at teaching interested

landholders and others how best to alleviate problems caused by beaver. Instructional materials are available for distribution statewide. Educational programs on beaver ecology and management are presented statewide.

Requests for direct assistance (wildlife specialists doing the work) are generally addressed on a first-come, first-served basis with top priority addressing threats to public health and safety, particularly along highway rights-of-way. Requests for help on state and county property and along highway rights-of-way should be made directly to the wildlife specialist. In general, the following priority rankings are observed when responding to requests for direct assistance:

- 1) State highways, roads and bridges
- 2) County-owned property in participating counties
- 3) Landholders in participating counties
- 4) Cities/municipalities in participating counties
- 5) Industrial/corporate landholders and landholder associations
- 6) Other lands

Logistic or travel cost considerations may require that some requests be worked out of order. In special cases, priority work areas may be established as determined by the wildlife specialists. Whenever possible, all requests for assistance will receive an initial response by telephone within 72 hours. Time of site visits and any field work activities will vary according to current workloads.

Before assistance begins, a wildlife specialist meets with all relevant landholders to determine the extent of the problem caused by beaver, if any, and makes recommendations on the best course of action for addressing the damage problem. At this time the wildlife specialist offers to teach the landholder(s) how to address the problem including hands-on training on the landholder's property. If the landholder is unable or uninterested in conducting the work and requests that the wildlife specialist conduct the work, the wildlife specialist estimates the time and cost share the landholder must pay to receive the beaver management services. The landholder(s) signs an agreement that includes the estimated costs, the type of activities to be conducted on his/her land (e.g., trapping, shooting, installation of water control devices), and the granting of permission to work on his/her land.

Wildlife specialists do not remove beaver and their dams if such activities are expected to have little benefit in protecting timber, agricultural interests, roadways, other property such as sewer systems or waste water treatment facilities, or protecting human health and safety. Sometimes a beaver damage problem affecting a landholder or the NCDOT rights-of-way originates on adjacent properties not owned by the landholder or the NCDOT. In these cases the landholder requesting the services pays for any work done on these adjacent properties. Further, wildlife specialists will work on adjacent lands only if written permission is received.

LANDHOLDER GUARANTEE

BMAP activities are guaranteed for a period of approximately 30 days following the completion of a project. If a problem recurs within the guarantee period, the project is reworked at no additional charge.

PERSONNEL AND REPORTS

BMAP WILDLIFE SPECIALISTS

Wildlife specialists are hired by, and work directly for, Wildlife Services. The number of wildlife specialists hired as full-time or part-time employees is determined by the BMAP budget. Wildlife specialists generally work year-round as weather and other conditions allow.

Demand for beaver damage management activities on public and private lands vary throughout the year with the least demand during the summer months. During such slow periods, BMAP wildlife specialists occasionally work on non-beaver related projects that might be available. All costs (salaries, travel, supplies, equipment, etc.) associated with such work are covered by the other project, resulting in a cost savings for the BMAP. This is a definite advantage to BMAP customers as additional BMAP services can be offered during the more critical times of the year such as the winter season.

SUPERVISION AND RECORD KEEPING

Wildlife specialists are supervised out of the state office in Raleigh and a district office in Whiteville.

Wildlife specialists and supervisors maintain records of all appropriate BMAP information with records based on the federal fiscal year. Information is reported to the NCWRC during periodic Advisory Board meetings. An annual report documenting all activities during the federal fiscal year (October through September) is provided to the Advisory Board and the NCWRC no later than December 31 following the end of the federal fiscal year. County officials are also kept informed on progress through periodic meetings and/or reports.

Landholders are kept updated about ongoing work on their property. Once a project is complete, the landholder is sent an invoice listing the beaver management activities conducted on his/her land including numbers of beaver and/or beaver dams removed, number of site visits, work start and stop dates, and cost. Landholders are given 30 days following billing to pay their cost-share. Landholders not paying for services will be ineligible for any future services.

Updated November 14, 2006

USDA is an equal employment provider and employer.
