Background: Since 1999, the Pender County Sheriffs Office (PCSO) has been utilizing the Open Software Solutions Inc. (OSS) Public Safety Software Suite for Dispatch, Records, Jail, and Data Sharing. In that time frame PCSO has recognized that there are functional needs that are no longer being met by the software solution in place today. This coupled with a continuous year to year increase in maintenance cost and the desire to implement a mobile network for use by responders in the field has led the Sheriff's Office/911 Center to seek a more comprehensive software package. After the required bid process, VisionAir was chosen by a panel made up of emergency agencies. This proposal by VisionAIR will streamline the process of providing law enforcement and emergency services to the citizens of the county. It will provide a completely integrated software solution (including the new mobile component) that will be utilized by county/city law enforcement, fire, EMS, and Emergency Management. This has been budgeted in the FY 07-08 Budget: \$136,859.00 (510-404500), \$43,571.70 (25-404500) and \$53,254.30 (251-404500).
