

National Weather Service

Wilmington, NC

Outlook Period: Fri Dec 13, 2019 - Mon Dec 16, 2019
 Time Issued: 10:20 AM EST Fri Dec 13, 2019

Prepared by: Reid Hawkins

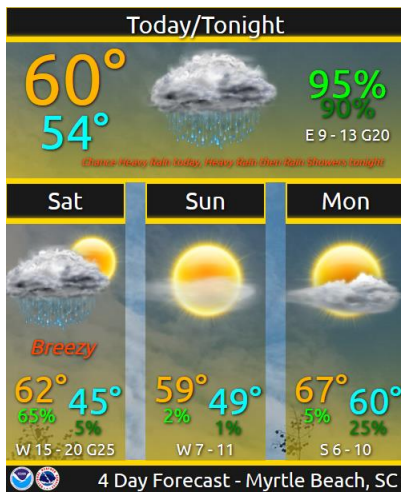

Overview: Low pressure developing in the Gulf of Mexico will move along the Carolina coast this evening. Canadian high pressure will build in from the northwest late Saturday through Sunday.

Primary Threats: Moderate to Heavy rain through Saturday Morning
 Possible Low Water at times of Low Tides on Saturday

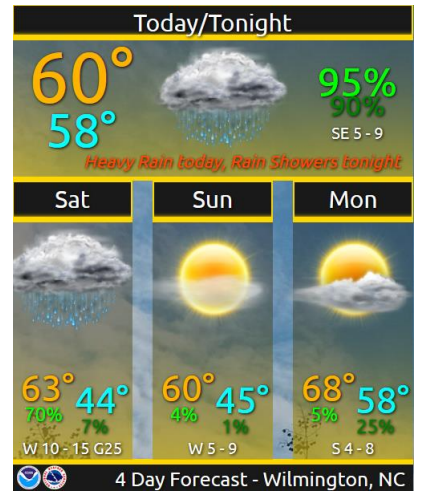

Impacts: Potential for 1 to 2 inches of across Southeast North Carolina and Northeast South Carolina through Saturday morning. At times of low tides along the coast, navigating through inlets could become hazardous as water levels fall to around -1 foot Saturday near 2 AM and again around 3 PM Saturday.
