

The proposed project is located at 18661 US Highway 421 Willard NC. The project (Cottage) is parallel to residence which has two existing driveways. One driveway is access to residence and second driveway is access to project(Cottage). The proposed project is a salon. The services provided will be male and female hair grooming/beauty services. This is a one operator salon with no employees. The project is a existing Cottage already on site with approved permit use. I am submitting a proposed use for cottage to be a salon. The construction activities will be inside construction. Electrical and plumbing needed and will have required permits as needed for county inspection. I see no negative impacts to the community. The traffic would be low because its an appointment only business advertised. The hours of operation would be Monday - Saturday 8:00am -6pm. I believe that this business will have a positive impact to the community by providing local quality beauty needs to a rural area.
