Black River Company NC, LLC is a mobile adventure-educational company. Our mission is to provide a service that will not only allow someone to escape from a busy life but educate the public about nature and the eco-life on the Black River.

We live by honesty, respect and believe in the community. Our vision is to help the public keep awareness to all that the outdoors offers and keep the history of the Black River and its surroundings ongoing.

Our goal is to be a small supportive and an educational company to the community. Our future goal would be to have a separate piece of property to outfit the customer and provide a base store front for the business.

We will target the general public and corporate companies for "team Training".

With Wilmington growing this is an ideal business for the public to take a break from a stressful area and relax in a natural environment. Bringing awareness to the public of our surrounding area could enhance other locally owned businesses in our community.

Black River Company NC will be an LLC company. We will offer guided kayak and boat tours on the Black River with educating the public on the history of the area. Our tours will have two guides, the Lead guide is a certified USCG Captain and our Tail guide has crewed on various vessels. The group will be given an oral and written safety review before entering the river. They will be given life jackets and the proper equipment needed. Paddlers will be in between the guides at all times while paddling. There will be a sign in/out sheet for paddlers which will have their identification and contact information listed.

We will be using the public Black River Boat ramps, private paid personal ramps and our personal dock. Parking will be at the Boat Ramps or on our personal property. Our kayaks and equipment will be stored in an enclosed utility trailer when not in use.
